

### In work with a Swedish or foreign education (college/university level)

### Percentage children 0-17 years after their parents' native country 2000-2011

Born in Sweden, one parent born abroad, born in Sweden, both parents born abroad, born abroad = all together 20% of all children below 17 years

Procent

Most important background variables for a successful education are socioeconomic status =

**parents' education and work situation.** These variables are more important than nationality.

Most children with foreign born parents' have therefore a more difficult basis for reaching a successful education diploma leading to work.
